

Albatronics

Line of Business

Electronics, Turnkey Solutions, Signal Processing & Communication

Established

1996

Leading Executive

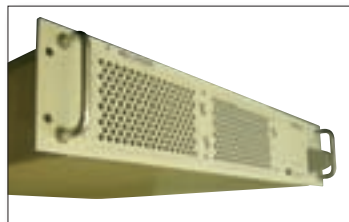

Mr. Alfred Dayan

Albatronics is a high tech company offering sophisticated solutions of RT & Embedded systems. The company founded in 1996. Based in southern Israel, at Omer Technology Park, provides hardware and software solution for leading telecommunications, military and high-tech companies in Israel, including: IAI, ELTA, MLM, Lahav, Mobileye, Elbit Verint & more. Albatronics has vast experience in defining, designing and developing Real Time (RT) applications up to system prototype and serial production. Albatronics' competitive advantage resides in its capacity as an experienced and dedicated research facility. This enables the company

- Control & Command systems
- Wireless Communication
- Ruggedized PC
- Stands harsh environmental conditions

Services

- Turn Key Projects
- System development: HW, FW, SW & GUI
- System integration
- Customizing products
- Airborne, Naval, Industrial, Medical & Commercial
- Production
- Maintenance

to provide an efficient and rapid response to changing market requirements and supply custom-made products supported by in depth research. By harnessing its professional staff, applying its unique know-how and leveraging its position as a leading developer of cutting edge technologies, Albatronics enables its customers achieve quality work in short periods of time.

Albatronics products supply capabilities of high performance signal processing such as recording system and frequency division multiplexer, control and command units and more. All integrated as part of airborne or ground COMINT and SIGINT systems.

Products

- Recording systems
- Baseband, Wideband and Narrow Band
- Frequency Division Multiplexor
- Signal processing systems

Albatronics has vast experience with Real Time Operating Systems such as:

- Embedded Linux
- Integrity
- VxWorks, including VxWorks 653
- VRTX
- Private RTOS

Among our services, we have the know-how in development with top notch processors and FPGA's, by the leading companies in the market such as Freescale, Intel, TI, XILINX, Altera & Lattice.

We are involved in the preliminary stages of the development up to the prototype's delivery, integration & serial production.

Formed by an expert team of dedicated professionals, Albatronics is proud to supply quality hardware, software and research solutions of tomorrow.
