Ashot Ashkelon Industries Ltd. is a leading manufacturer and supplier of technologically advanced systems and components for the international aerospace and defense industries.

Ashot Ashkelon has over 450 employees and more than 45 years of experience in the manufacturing field. Ashot is a subsidiary of the Israel Military Industries Ltd. (IMI) and publicly traded on the Tel Aviv Stock Exchange.

Reliance Gear Corp., a fully owned U.S. subsidiary of Ashot Ashkelon is located at two sites in Addison IL. Reliance Gear serves as the regional basis for gear and transmission development for aerospace, defense and commercial customers.

Aerospace

Ashot is a build-to-print and build to-Specifications manufacturer, integrator and supplier of turn-key products for the leading OEMs in the aerospace industry. With a strong emphasis on production, quality and highly qualified personnel, Ashot is recognized as a high quality supplier. Our products are installed on more than 20 different aircrafts. Ashot predominantly supplies flight safety products and specializes in six main technological areas: **Gearboxes and Transmissions, Jet Engine Shafts, Landing Gear Components, High Lift Systems, Tungsten Balance Weights and Electromechanical Assemblies.**

As a vertically integrated company, all the production and special processes are done in-house. After being assembled and tested using special test benches, the products are supplied directly to the aircraft assembly lines. Ashot's QA Department is AS9100C certified, and the special processes are NADCAP approved, in addition to specific approvals that have been granted by Ashot's customers. Our customers benefit from long-term supply agreements, complete turn-key products and concurrent engineering.

Ashot's R&D is capable of Build to Spec products

design. All designs comply with aerospace standards. Ashot's R&D brings innovative solutions to aerospace components.

Defense

Ashot Ashkelon Industries Ltd. is a leading supplier of **gear-based assemblies** and **drive-train products** for tracked and wheeled vehicles. Ashot offers complete solutions of **power pack** and drive train sub-assemblies for armored vehicles, from heavy main battle tanks to light armored personnel carriers. The company provides design, engineering and manufacturing in addition to build to-Specifications and builds to-print production based on customer designs.

Experienced engineering skills, along with high capacity production and financial strength, place Ashot as a leader in new design or upgrade programs for tanks and APC's mobility.

Ashot's range of products includes **transmissions, final drives, suspension systems and track parts** which are all battle proven. The company also provides comprehensive design, engineering, testing and prototyping service solutions in support of armored vehicle development and modernization of programs worldwide.

As a vertically integrated company, Ashot has full manufacturing capabilities in-house. Ashot is AS9100C and ISO 9001; 2008 certified. In addition, Ashot has specific approvals that have been granted by Ashot's customers such as NATO, US TACOM, IDF Q.C. and Mil-Q-9858 certification. Our strict quality criteria ensure that our customers receive the best quality products customized to their specific requirements, while meeting schedule demands at competitive prices

Ashot has strong supplier relationships with governmental customers and defense organizations worldwide.
