AudioCodes, a VoIP technology market leader, designs, manufactures and sells advanced Voice over IP and converged VoIP and data networking products and applications to service providers and enterprises.

Company Overview

With over 20 years in the telecommunications market, AudioCodes offers a broad range of solutions for both service provider and enterprise deployments. These solutions are built around the Company's field-proven VoIP product range that include Session Border Controllers (SBC), Media Gateways, Multi-Service Business Routers (MSBR), IP phones, Residential Gateways, Media Servers, mobile communications solutions, a diverse suite of communications and management software applications and professional services.

With full support for industry standard protocols such as SIP and proven interoperability with all industry leading soft-switches, PBXs, IP-PBXs and unified communications platforms, AudioCodes delivers innovative solutions for virtually any voice communications environment, offering reduced total cost of ownership (TCO), enhanced features and superior voice quality.

Solutions

Enterprise Unified Communications

AudioCodes offers voice solutions for enterprise Unified Communications (UC) which are intended to simplify and

accelerate the implementation of state-of-the-art corporate telephony driven by AudioCodes' innovative products and services. AudioCodes products are formally integrated and certified with many UC systems such as Microsoft, Avaya, Alcatel-Lucent, ShoreTel and open-source systems such as Asterisk. AudioCodes' SBC is a central element in modern enterprise voice architectures, facilitating secured, resilient and high voice quality connectivity remote users and external voice services such as SIP Trunks, hosted voice applications,

mobile VoIP and Web communications. "AudioCodes One Voice for Lync" leverages AudioCodes' Microsoft-qualified, end-to-end voice network elements, wide-ranging services and extensive expertise to enhance Microsoft Lync voice implementations.

Contact Centers

AudioCodes VoIP network solutions for Contact Centers are designed to help enterprises and service providers in their transition towards an all-IP voice infrastructure by providing all the network elements required to enable and support the smooth operation of the Contact Center application, while removing the risks of migrating into an IP environment.

Service Provider Business Services

"AudioCodes One Voice for Hosted Services" enables service providers to seamlessly connect customers whether they are migrating from legacy trunking to SIP trunking services or migrating to complete hosted PBX and unified communications from the cloud. AudioCodes partners with BroadSoft in promoting this solution of unified communication services.

Mobile Communications Applications

AudioCodes offers a range of mobile communications applications that deliver high quality HD VoIP calls, messaging and presence via mobile devices for enterprise users and service provider customers which includes mobile VoIP applications and voice recognition based IVR and recording.

Ownership

AudioCodes is a public company. The Company's shares are traded on the NASDAQ (symbol: AUCD) and the Tel Aviv Stock Exchange (TASE).

AudioCodes Offices

AudioCodes' international headquarters and R&D facilities are located at Airport City, Lod, Israel with additional R&D facilities in Beer Sheva and the U.S. and with branch offices in the U.S., France, Germany, The Netherlands, Italy, UK, China, India, Japan, Korea, Singapore, Argentina, Brazil, and Mexico.
