Baccara Geva Ltd. specializes in the manufacture and production of products for automation, especially in process industry and irrigation.

Products and Services

Solenoid and process valves, air valves and irrigation control systems. For over 50 years Baccara Geva has been a leading manufacturer of the highest quality solenoid valves and fluid control system solutions, supporting OEM and process applications. During our many years of experience in the fields of solenoids, we have developed specific applications for medical, instrumentation and special purposes, in food and beverage, digital printing, process industries, HCAC-R and irrigation systems. Whether your application is cryogenic, highly corrosive or must be NSF-approved, Baccara Geva can handle the most demanding and complex application.

Quality Assurance

Baccara Geva holds ISO9001:2010 certification and Environmental Management System ISO14001, and complies with the Occupational Health & Safety Management Standard SI OHSAS18001:2007.

Marketing

Our workforce consists of 300 employees. Baccara Geva's main markets are in the USA, Europe, Latin America, Australia, South Africa and the Far East.
