

BAZ Airborne Components and Assemblies

Line of Business

Aerospace Fabrication and Assembly

Established
1977

Leading Executives

Jacob Helfman
Founder and President

Eytan Cohen-Munwes
CEO

Meir Hazan
VP of Quality

BAZ Airborne Components and Assemblies is a worldwide leading supplier for the aerospace industry for over than 35 years! BAZ is privately owned and employs about 220 people. It specializes in sheet metal and extrusion fabrication, surface-treatment and assembly. According to the customer's needs, BAZ performs build-to-print and build-to-specification projects using aluminum, steel, stainless steel, titanium, etc.

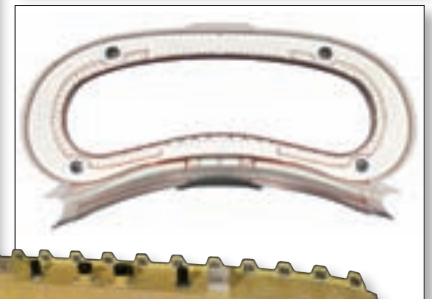

Certification

BAZ is AS9000 certified and carries special-process/NADCAP certifications for nearly all major OEM's.

Technologies and Competences

- Tool design and fabrication
- Part design
- Extrusion and sheet metal forming
- Heat treatment
- Milling
- Welding
- Surface treatment/processing
- Surface technologies (high gloss polish)
- Part assembly

BAZ welcomes the opportunity to participate in long-term/large quantity as well as short-term/limited quantity contracts!

Advantages

One of the major advantages of BAZ is that almost all the required processes can be performed in-house. That, coupled with its experienced supply chain, allows BAZ to deliver the complete package to their customers.

Product Examples

- Fuel tank assembly
- Leading edge
- Wing-tip welded assembly
- Canopy
- Engine nacelle
- Tail cone assembly
