Carmel Industries & Parts is a leading cable manufacturer, celebrated 40 years of activities in 2010.

Main Product Line

The company's main product line is for the Automotive Industry, producing mostly Bowden cables – Clutch cables, Brake cables, Accelerator cables, Kick down cables, Detent cables, Shift cables and Push & Pull cables.

Suitable for a Wide Range of Cars

Carmel offers cables for a wide range of American, European and Japanese cars. Among its products are those for Original Equipment Manufacturers (OEMs) including customers such as BMW.

After Sales Market

The After sales market including sales through distributors and marketing organizations / mass merchandisers is another main activity of Carmel. The company is also willing to move into small and medium-sized series. Carmel Engineering is capable of producing prototypes and testing them based on the client's drawings and specifications. The company also provides best-quality consultancy.

International Standards

Carmel guarantees the highest standards and quality. The company's production facility is ISO9001:2008 and QS9000 certified. All production is controlled by the Israel Standards Institute.

Carmel's manufacturing infrastructures also includes powerful tailor-made Testing tools and Fixtures that are required for performance proof.

US subsidiary

The high standards and capabilities, and the establishment of a US based subsidiary with a local warehouse (in Alabama) have opened the door for Carmel to be qualified as a supplier to the US Military Forces (today one of its key customers).

The USG is buying cables that are used in a variety of vehicles including the Abrams / M1 tanks, HMMWVs (Hammer) and others.

Elevator Cables

Carmel also supplies cables for elevators.

Off-Road and Other Equipment

Another product line is for Off-Road Equipment including Trucks, Tractors of all kinds and Forklifts. Carmel can also design and produce cables for boats, motor-cycles and other similar purposes.

Technological Pride

Carmel is proud of its technological capabilities, quality of products, its delivery terms guarantee, and its competitive prices, which make the company a major player in the US and European markets.

Unmanned Aircraft Vehicle (UAV) - Push Pull Cables

Carmel is certified by Israeli Aerospace Industry as a manufacturer and supplier of a wide range of push pull & control cables installed on UAV's engines. Cables for throttles, and diversified engine functions.
