Established
2003

Leading Executives
Mr. Jon Brodd
CEO

Mr. Zach Frenkel
General Manager

Cima NanoTech is a smart nanomaterials company delivering high performance, next-generation transparent conductors. Our technology enables transparent conductors with excellent electrical conductivity, high transparency and flexibility, making it an ideal conductive material for new, emerging markets like large format multi-touch screens, (proximity) capacitive sensors, transparent antennas, wearables, transparent microwave and electromagnetic interference (EMI) shielding, OLED lighting, transparent heating, and many others.

The company serves the global electronics industry through its R&D and production center in Israel and its affiliate offices in the US, Singapore, Japan, Korea, China, and Taiwan. More information is available at cimananotech.com.

Recent Awards:

- **2014 Red Herring North America Finalist** - recognizing its business potential to grow at an explosive rate.
- **SID Display Week 2013** - "Best in Show" Award, recognizing the significance of its product development and within the display industry.

Main Products

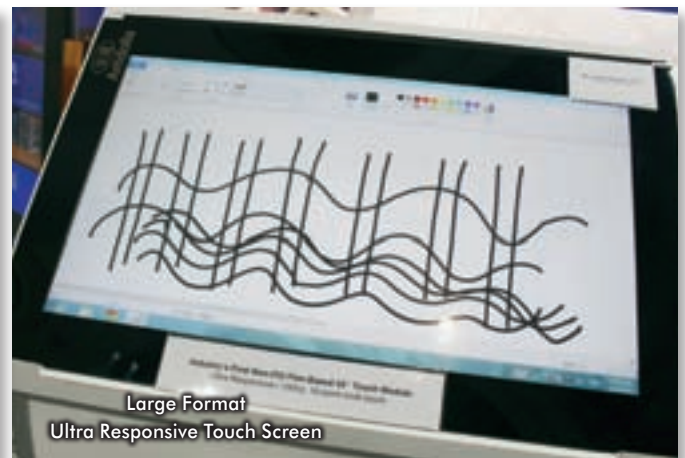

- **SANTE[®] Transparent Highly Conductive films** – Uniform, Color Neutral, Non-Moiré, Flexible.
- **FS100** – High conductivity film for Transparent Heaters and EMI Shielding.
- **FS200** – High transparency film for Large-Format or Curved Multi-Touch Screens, Capacitive/Proximity Sensors, and thick cover glass touch screens (i.e. ATM).

SANTE[™] transparent conductive film and coatings

SANTE[™] transparent conductive film and coatings

Large Format Ultra Responsive Touch Screen

Additional information

Employees: the company currently employs approximately 60 persons. The skilled and aggressive R&D team in Israel includes numerous PhD chemists and engineers.

Equipment: The Israeli facility has fully equipped R&D and QC labs and Pilot coating line. Commercial production coating lines are present in Korea, US and Japan.

Marketing: The company employs a local sales and marketing force for international customers in Israel, US, Korea, Singapore, Japan, China and Taiwan.

Company Headquarters: Cima NanoTech Israel is a fully-owned subsidiary of Cima Nanotech Inc. headquartered in St. Paul, MN (US) and operational headquarters in Singapore.

- **FS200-LR** – Ultra-high conductivity for Transparent Antennas and EMI Shielding.
- **FS110** – High conductivity film transferable to many substrates allowing substrate freedom for diverse applications, also enabling in-mold or thermoforming processes.
