

EMG - Electronic Management Group Ltd.

Line of Business

Consulting, Planning and Integration

Established

1989

Leading Executive

Mr. Eli Peltz
Managing Director

EMG - Electronic Management Ltd. is a consulting firm, specializing in design and project management of integrated multicomponent security systems. Established in 1989, the company's vast experience includes successful projects in security, safety, building management systems (BMS) communications, multimedia (Low Voltage), command and control centers, physical protection, disaster and emergency response planning.

Services

EMG provides a variety of services for developing low voltage projects, from characterization and specifications to close supervision and system implementation. EMG is an ISO 9000 accredited company and services are in conformance with ISO-9001. Highly qualified professionals provide the services that the company renders with international experience in practical deployment of large complex systems.

Up-To-Date Security Technologies

EMG is engaged in evaluating and deploying the most up-to-date security technologies to many government, industrial and service organizations both in Israel and abroad including the Israel Defense Forces.

Completed Projects

EMG has designed and provided consultation for some of the largest and most advanced security command and control projects in Israel, South Africa, Europe, South America and the Far East.
