The headquarters, manufacturing and R&D facilities are located in a facility covering more than 50,000m² in a modern industrial park in the Western Galilee of Israel.

Fishman Thermo-Technologies Ltd. specializes in the development, production and supply of automobile and truck cooling systems and products, especially thermostats to major OEM's operating within the industry.

The Company owns an international IAM brand called **MotoRad**.

The staff at Fishman Thermo-Technologies Ltd. consists of over 360 people from diverse backgrounds, offering a pool of talents, cultures, languages and qualities that makes it unique.

Our team is highly motivated and we strive to provide our customers with an innovative product, at a cost-effective price and in a timely manner.

Main Line

Thermostats and Variable Flow control of the cooling system

Our line of thermostats is one of the most sophisticated and advanced in the automotive industry. With our range of sophisticated machines, which includes a variety of high-speed assembly and automated calibration equipment, we can fill any requirements.

State-of-the-art equipment, strict quality control and functional testing applied to each thermostat ensure that our customers can trust the high quality product used in their vehicle.

Fishman Thermo-Technologies offers the largest line of thermostats in the world, with over 270 different designs and 50 different temperature ranges for virtually any vehicle and engine on or off the road.

Our thermostats range covers the basic wax operation, heated (MAP controlled) and Electronic controlled.

Radiator Caps

Our radiator pressure caps are designed and manufactured to meet original equipment specifications and standards. The caps offer precise pressure control and high quality materials for long lasting durability. Fishman Thermo-Technologies offers pressure caps from zero pressure to over 30 PSI/2.2 bar integrated within racing applications.

Fuel Caps

Fishman Thermo-Technologies fuel caps are designed and manufactured to be consumer friendly for both Non-locking and Locking caps. All fuel caps include venting as required, positive closer cover, and an optional locking mechanism.

Our fuel caps have been independently tested for emission control effectiveness, their ability to remain sealed after a side collision, cap integrity simulating a 90 Km/h collision, tip test and vent test. Motorad caps successfully passed all testing.

Oil Filler Caps

Fishman Thermo-Technologies oil caps are designed to meet specifications

provided by various automobile manufacturers. The newly designed oil caps have integrated "ratchet" systems for positive closer, and elimination of over torque of the cap.

Quality Assurance

- TS16949; ISO 9001-2000; ISO 14001; ISO 18001
- Along the years we have been audited by car manufacturers and rewarded with high grades of 97%-99.7%
- Durability performance (Temp. cycling)
- Pressure drop and flow rate
- Performance tests: STO, Stroke, Hysteresis
- Valve leakage test
- Flow rate testing
- Outlet housing sealing test
