Marketing & Sales

Extal Ltd. is a private, international company with Swiss ownership. Extal has 250 dedicated employees of which 32 are academics and 24 engineers. Extal's manufacturing location is in Israel, on an area of 85,000 m². Extal's extrusion capacity is 13,000 tons per year and we offer numerous post extrusion manufacturing processes.

Extal – R&D and Engineering

Extal's extensive knowledge in development and engineering comes from international cooperation with leading companies.

The company's engineers are skilled and experienced, with backgrounds in materials engineering, applied physics, and chemistry. The engineering department is fully focused on customer needs and it offers engineering support starting from the first steps of product development.

Extal – Aluminum Extrusion Lines

Extal has two presses for aluminum extrusion: a 4000 and 1800 ton press. Extrusion is fully automated and regulated by sophisticated computer control software. Extal specializes in the extrusion of 6XXX series aluminum. Extal has its own in-house die shop, and a technical department to support customer needs and supply the best solutions.

Extal – Secondary Manufacturing

As part of Extal's goal to comprehensively serve customer needs, the company offers secondary manufacturing including: punching, cutting, bending as well as painting and anodizing. Extal's versatile capabilities and expertise enables us to provide custom

made solutions to new and complex problems.

Extal – Paint Factory

Extal's paint factory is equipped with a complete line of pre-treatment solutions, using chrome free, environmentally friendly chemicals. The paint factory uses Corona spray guns and recyclable powder paint. The fully automated paint line ensures that each profile remains at each stage of the process for the correct amount of time.

Extal – Going Global

Special care is given to the packaging and transport of products, and advanced methods are used to ensure products reach customers intact. Extal builds crates to customer specifications and packaging options include cardboard and plastic wrap, wooden crates and steel banding. Additionally, Extal can meet any customer packaging requirements.
