

# Galtronics Corporation Ltd.

## Line Of Business

Antenna Systems:  
Design & Manufacture

## Established

Tiberias, Israel - 1978

## Leading Executive

Ephraim Ulmer  
President & CEO

**G**altronics Corporation Ltd., a Baylin Technologies (TSX: BYL) company, is a global company providing innovative antenna and communications solutions of the highest quality and design.

Galtronics has state-of-the-art design centers around the globe as well as world class manufacturing facilities in China and Vietnam.

Galtronics offers custom and off-the-shelf antenna solutions from concept and design to production and delivery of products for the world's leading

## Integrating Customized Antenna Solutions

Galtronics Broadband Antenna Division designs and manufactures embedded or external antennas for various applications as for Home Networking (routers, gateways, and set-top boxes), 2-Way-Radio communication, Telemetry-M2M (machine to machine) and Telematics (car communication). During the design stage we are partnering with you to integrate the antenna into your device and optimizing the antenna design to maximize performance and meeting your requirements such as

wireless organizations. Since Galtronics was established in 1978, the business has grown into an international platform with operations in North America, Europe and Asia.

## Trusted Partner and Leading Supplier to Major Global Cellular Handset OEMs

Galtronics offers major OEM customers with a range of PIFA, STILT, LOOP, FMA, and LDA designs that deliver single and multi-band performance, as well as GPS, WIFI, Bluetooth and other wireless standards. Our designs are adapted to match customer requirements, including integrated speakers and acoustic cavities. Whether it is low-cost stamped metal, flex-film designs, two-shot MID molding or intricate laser directed structuring (LDS), Galtronics has the right solution for you.

space limitations, interface, shape and TM/Logo. For our LMP customers, Galtronics offers single, wide and multiband antennas covering frequency bands from 130 MHz to 6000MHz.

## Providing High Performance Connectivity for World Leading Operators

Our extensive PEAR™ in-Building Small Cell and DAS Antenna product line offers true omni and first-class directional SISO and MIMO indoor antennas with high-gain. The EXTENT™ product line is comprised of outdoor DAS antennas along with narrow-beam width antennas for high-capacity venues such as stadiums. Both product lines have been endorsed by carriers in the USA, South America, Europe and Asia. We are committed to supporting your business success by enabling high performance connectivity for all your products and systems, as we are successfully doing for other world class OEM's and market leading products.
