Reducers and Gears
Design and Manufacture

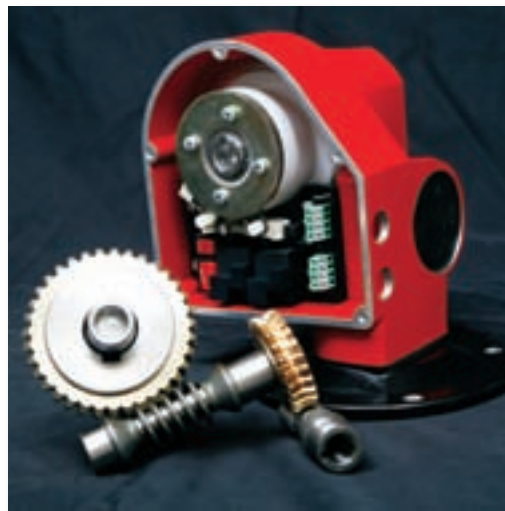

Leading Executives

Mr. Eitan Aufleger
CEO

Mrs. Limor Ohayon
International Marketing
Manager

Greenshpon Engineering works has been in the forefront of the technical industry since it was established in 1952.

Today we are well-known experts for special Tailor-Made Gearboxes/Reducers and Gears. Our Knowhow is supported by the appropriate equipment. We are in a position to provide technical solutions for all types and all quantities.

Engineering

At Greenshpon we meet the demand for maximum reliability and the highest quality of our designs at minimum cost.

At Greenshpon, quality means management commitment to employ the latest manufacturing technology at every stage of production. From receiving the order to delivering the finished product, every operation is double checked.

We assure a level of accuracy and reliability equal to your most demanding specifications, including design and production according to ISO standards.

Production

The technical skills of our personnel and our strict standards for quality assurance enable us to supply you with the most sophisticated product, regardless of the complexity of the components and their configuration.

You are invited to consult with our dynamic team of engineers. They will assist you in creating transmission systems and solve problems which occur with efficient output and unfailing reliability of the final product in order to meet the requirements of

your specific application.

At Greenshpon we will assist you also with upgrading existing systems and are able to repair all Gearboxes available today of any Brand worldwide.

Applications

Our customers come from a wide international spectrum of the industrial world. We are familiar with the

various needs of high – tech, medical instruments, radar telemetry, etc., also with those of manufacturing installations for manifold industries such as: food processing, baking, agricultural equipment, general machinery, plastic industries, chemical industries, mining and transportation industries.

Greenshpon developed and implemented technological solutions for the automation of agriculture needs since 1983.

We developed a special line of gear-motors of different applications for Livestock Equipment such as Poultry Houses, Dairy Farms, Swine Farms and Greenhouses.

Combining old fashioned customer relations with advanced technology, we will tailor – make the gearbox you want with the quality you need.
