

H.R. Givon Ltd.

Line of Business
Metallic airframe
assemblies and
components

Established
1970

Leading Executive
Mr. Ronen Givon
CEO

Givon is Israel's leading manufacturer of metallic airframe components and assemblies.

As an AS9100 certified manufacturer, we are offering a broad range of capabilities:

- CNC milling of Ti and Al alloys in 3, 4 and 5 axis up to 6000 mm (236 inch) long
- Sheet metal fabrication of Ti and Al alloys
- Mechanical assembly
- Chemical Processing – Paint and Sol-Gel (Nadcap and BAC approved)
- Stress Relief of Ti alloys (Nadcap and BAC approved)
- Heat Treatment Al alloys (Nadcap and BAC approved)

- Boeing F-15 Eagle
- Lockheed Martin F-16 Fighting Falcon
- Sikorsky UH-60 Black Hawk

Why Givon?

- As a turnkey solution provider, we offer our customers a unique combination - machining, sheet metal fabricating and assembly - all in one location.
- We expedite time to market, especially with challenging lead times or the need for small production lots.
- We execute design changes quickly and efficiently.
- We welcome challenges and make use of new technology and innovative solutions throughout the process.

GIVON
Expanding the Horizon

- Shot peening (Nadcap and BAC approved)
- Penetrant inspection (Nadcap and BAC approved)

Selected Programs

We participate and cooperate with global leaders in the aerospace industry.

Our products can be found on:

- Boeing 787 Dreamliner
- Gulfstream G150 and G280
- Boeing 737, 767, 747 passenger to cargo conversion

- We are an experienced, knowledgeable production and manufacturing partner.
- We offer competitive pricing.
- We are large enough to deal with complex challenges but without extra bureaucracy or administration. In short, we achieve maximum efficiency with minimal bureaucracy.

For Givon and for our customers, an airplane on ground (AOG) is not an option.
