Line of Business

Industrial valves and Actuators for industries such as: Chemical, Petrochemical, Pharmaceutical, Mining, Natural Gas, Petroleum and Energy

Established

1949

Leading Executive

Mr. Eliad Katz
CEO and President

Habonim is a leading manufacturer of high-end industrial ball valves and pneumatic actuators. Established in 1949 in northern Israel, Habonim is a well-known and much respected company that incorporates quality, innovation, reliability and safety. Headquartered in Israel, our company exports to over 52 countries utilizing an extensive distribution network of international subsidiaries in the USA and now in Australia. We also have sales offices in the U.K. and China and a strategically located network of distributors worldwide.

With over 60 years' experience in industrial applications, Habonim develops, manufactures and distributes its premium industrial ball valves and pneumatic actuators, providing solutions for many diverse industries including, mining, chemical, petrochemical,

Leading the market in servicing the natural gas industry and its subsidiary sectors, all Habonim products comply with the strictest natural gas industrial standards and certifications, providing an extensive range of solutions that include the stringent API 6D standard trunnion valve product line in response to market demand.

Our company's products are highly durable under extreme environmental conditions and when used with aggressive materials. They are manufactured using a variety of raw materials, undergo rigorous testing in specific inspections and meet the strictest international standards on the market.

Habonim takes pride in being an internationally recognized brand known for supplying quality industrial valves and actuators, while providing
