

Hagiva Y.H. Ltd.

Line of Business
Metal Products

Established
1987

Leading Executives
Mr. Moshe Jan
Managing Director

Mr. Yigal Jan
Deputy Manager

Hagiva Y. H. Ltd. is engaged in the construction of complex heavy metal products for the building industry such as tanks and pipes for gas, fuel, water and flammable and combustible liquids and power stations. The company employs more than 160 highly skilled and experienced professionals and Hagiva has ISO 9001-2000 certification.

Brief History

Hagiva was founded by Yitzhak Jan in 1987. Mr. Jan, who today serves as President, has over 30 years experience in the heavy metal products sector. The company is privately owned and its state of the art plant is located in Ashkelon in southern Israel.

Main Products

Hagiva produces and constructs complicated structures such as steel construction, tanks, gas storage tanks, gas piping systems, fuel piping systems, water piping systems, steel underground tanks for flammable and combustible liquids, conveyor machineries and maintenance works for different sectors.

Organizational Base

Hagiva's organizational base includes: a leading edge production plant, advanced mechanization technical engineering office, a quality control system, highly professional staff, skilled and experienced construction and performance teams. The company offers customers a one-stop shop from planning to project completion and aftersales maintenance and service.

Strong Customer Base

Hagiva's customer base in Israel includes: Intel; The Israel Electric Corp.; Nesher, Israel Cement Enterprises; Rotem Amfert Negev; Dead Sea Works;

Ashdod Port; Haifa Port; Ytong; Solel Boneh; Yehuda Steel; Agan Chemicals; Eilat Ashkelon Pipeline; IDE Technologies; OTID Desalination; Israel Aerospace Industries; Israeli Refinery.

Production Equipment

- Pantograph CNC and Plasma, machine capacity: 6500 x 12000mm. Omnimant Messer Griesheim
- CNC Punching and Plasma cutting machine. Capacity: Max material thickness 20mm. W.A. Whitney U.S.A.
- CNC Break Press: Capacity: 260 ton - HACO
- Guillotine: Capacity: 13mm x 4050 - HACO
- CNC automatic drilling machine for beams and profiles. Daito Seiki Co. Ltd. Japan + 1By FICEP, Italy
- Three Roll Hydraulic plate bending machine. Capacity 3000x60 mm plate thk. Made in MG Italy.
- Universal Bending Machine
- CNC drilling and milling machine. Table 3000x1600mm. Oerlikon, Switzerland.
- Plate milling machines
- Lathe machines
- Geka 2 cylinder shearing and punching machines
- Band sawing machines
- Welding machine for: shielded metal arc welding, submerged arc welding, self shielded flux cored welding, gas shielded arc welding.
- Robot and tractor welding
- Grinding machines
- Profile bending machines
- Drilling machines (two types)
- Hydraulic workshop strengthening and cumbard press for beams. Capacity: 200 ton x 12000 x 1000mm.
- Universal press
- Single chambered blast machine
- Portable flame cutting machine
- TRUMPF TKF 1500 - 0PLUS beveling machine - an electrically operated hand machine.
- Three different types of cranes for site works.
- Cranes inside the factories.
- Forklift trucks

Financial Data

Sales in 2014 amounted to \$32 million.
