

IBEX Technologies

Line of Business

Product development, tooling production and global project management for the automotive industry.

Leading Executives

Mr. Raphael Moisa
Managing Director

Mr. Oleg Popov
Managing Director

IBEX Technologies is an engineering and manufacturing company founded to research, engineer and manufacture multi-disciplinary products and technologies.

IBEX Technologies was founded in 2011 by Raphael Moisa and Oleg Popov to implement their vision of excellence.

Our industry experience in the automotive market positioned us to target new industries and to successfully diversify. We have implemented our systems to successfully grow as an engineering

program between Israel and China under MATIMOP – Israeli center for R&D on behalf the Office of the Chief Scientist (OCS) in Israel.

Engineering Services

IBEX Technologies team work directly with your engineers to add value to the design process.

- Numerical simulation services, in house prototyping and testing
- Production of soft tooling and small series.

Design, Manufacturing of Injection Molds & Dies

IBEX Technologies supplies high quality tools for the automotive industry.

- We specialize in manufacturing cost-effective custom injection mold tooling & dies in China.
- We manage, supervise and control our approved sub-suppliers in China, Portugal, Swiss and Ukraine to ensure an attractive up front cost, high quality solution within defined lead time.

services supplier for automotive, consumer products, electronics, medical devices and defense.

We excel at both quality and delivery rating while meeting the competitive demands of the global market place.

IBEX Technologies is known for its service, creativity, technology and commitment to excellence.

Specialties

Product development, design & engineering, assembly devices, customized fixtures & jigs, design & manufacture of injection molds & dies, complementary and secondary operations.

Main activities and capabilities

Research & Development

- New product development and innovative technologies for the automotive global industry.
- Leading Bi-lateral industrial R&D cooperation

Assembly devices, customized fixtures & Jigs

Design & manufacturing of assembly devices, testing fixtures, jigs and mechanical modules.

Project Management

Global management of entire project life cycle including logistic, tool delivery, local tool launching and technical support.

Quality Assessment

ISO 9001 - 2008
ISO EN 13485

Our Main customers

VISTEON, RENAULT, GAZ, RAVIV Group, FOAMOTIVE

IBEX Technologies – The Intelligent Choice For Partnership.
