Mr. Nir Gilad
Chairman

Mr. Stefan Borgas
President & CEO

ICL, a global manufacturer of products based on unique minerals, fulfills humanity's essential needs primarily in three markets: agriculture, food and engineered materials.

The Company's agricultural products help to feed the world's growing population. ICL is a leading provider of potash, phosphate fertilizers and technology-rich specialty fertilizers – critical inputs for increasing crop yield and quality. ICL is the world's 6th largest producer of potash, the largest producer of PK fertilizers (compound potash and phosphate fertilizers), and a major Specialty Fertilizers player with a broad range of soluble, slow-release and controlled-release offerings. The Company is also the first company in the world to produce polyhalite, an organic fertilizer.

Food additives that ICL produces enable people to have greater access to more varied and higher quality food. ICL is a leading provider of value-

brominated), phosphoric acid, and drilling fluids, as well as a major provider of drilling biocides, mercury emission control products, water treatment solutions and other chemical niche markets. ICL's mining and manufacturing activities are located in Israel, Europe, the Americas and China, and they are supported by global distribution and supply networks. The Company benefits from a number of unique advantages, including its vertically integrated activities and complementary and synergistic downstream operations for the production of unique end products; its balanced and varied product portfolio in growing markets; and its worldwide presence with proximity to major global markets in developing regions.

ICL operates within a strategic framework of sustainability that includes a commitment to the environment, support of communities in which ICL's manufacturing operations are located and

added specialty formulations that enhance food processing for the bakery, dairy, meat, poultry and seafood industries. With vertically integrated operations, a strong technology platform and know-how, ICL is the world's leading provider of specialty phosphates and a preferred supplier of texture and stability solutions.

In engineered materials, ICL's formulations are used in thousands of products to make them safer, more durable and longer lasting. With proprietary technology and leading positions in bromine and phosphates, ICL is the world's largest provider of flame retardants (organophosphorus and

where its employees live, and a commitment to all its employees, customers, suppliers and other stakeholders.

ICL is a public company whose shares are traded on the Tel Aviv Stock Exchange (TASE: ICL). The company employs around 12,000 people worldwide, and its sales in 2013 totaled \$6.3 billion. For more information, visit the company's website at www.icl-group.com
