

IDO Off Road Center

Line of Business

Ido Off Road Center provides innovative and technical solutions including vehicle design and manufacturing.

Established

1984

Leading Executive

Mr. Ido Nissan Cohen

A leading institute in the Israeli off road, and racing world, and well-known among the defense community, Ido Off Road Center provides innovative solutions on the technological cutting edge. These solutions range from designing and building vehicles for any purpose for rough terrain, off road and rally races, manufacturing and installing specially prepared suspension kits, under body protection for extreme use on off road vehicles and also modifying and enhancing driveline components. Ido Off Road Center was founded in 1984 by Mr Ido Cohen, who is a leading figure in the Israel off road and racing arena. He serves as the general manager of Ido Off Road Center and personally supervises each of the designs and improvements built by the company.

Defense Vehicles

The company builds specially adapted vehicles for the Israel Defense Force (IDF), defense, various contractors and civilian companies including ELTA, Israel Aerospace Systems, YTS, RAFAEL, Elbit systems, The Israeli Automotive Industries, Gaya, Sultam, Logic Ltd, Aeronautics Systems as well as other foreign companies such as Mahindra Ltd. and more.

The company strives to fulfill its clients every desire and needs. For off-road excelled performance, the company meets every requirement or challenge and enjoys doing so.

Ido Off Road Center takes pride in its products, and strives to innovate and constantly improve them.

Extensive Experience

The company has gained most of its 29 years experience by building and improving off road race vehicles that have raced in the roughest terrains available in the Middle East region and around the world in races like the "Paris Dakar Rally" (2001, 2002, 2004 – a race in which Ido and his team won first prize in its category), "Pharoes rally" held in Egypt – in which Ido won first prize as well, and the "Top Track Challenge" held in California.

In-House R&D

The company has its own in house R&D department. Ido Off Road Center designs its own products such as its various vehicles as well as its vehicle improvements and technical solutions. The company also has full documentation as required for mass scale production design.
