

Israel Aerospace Industries Ltd.

Established
1953

Leading Executive
Mr. Joseph Weiss
President & CEO

Israel's largest Aerospace and Defense group, government owned Israel Aerospace Industries Ltd. (IAI), is a global leader in the military, homeland security and civil aerospace markets. Implemented in space, air, land, naval and cyber domains. IAI's integrated systems are also supporting cutting edge solutions for homeland security and cyber. The same expertise is also providing advanced and innovative applications in the fields of commercial aviation and robotics. As a national center of excellence for advanced technological fields IAI maintains extensive research and development (R&D), engineering, manufacturing and testing capabilities to develop, produce and support complete systems, from the component, sensor and subsystem to large scale integrated systems, support systems of expertise.

systems and provider of key sensors for other air and missile defense systems. IAI is also leading the Barak 8 program, providing an advanced long range air and missile defense for land base and naval combatants.

Unmanned Aerial Systems (UAS)

As the pioneer of unmanned aerial systems (UAS) technology and global leader in this growing area, IAI has been supporting many types of UAS with over 50 customers worldwide, where IAI's unmanned systems performed over 1,200,000 operational flight hours performing intelligence gathering and targeting missions in support of all main military operations carried out in recent years, around the world.

TECSAR Satellite

The launch of "Ofek 10" satellite

Green Pine Radar System

The "Katana" - IAI's USV

The Company's Core Areas of Activity Include:

Space

Positioned as Israel's leading integrator for space technology, IAI has a proud legacy of 13 satellites deployed in space (10 are currently operational). IAI offers observations and communications satellite, scientific satellites, launchers and ground services. With the latest members of OPTSAT imaging satellites line, TECSAR - Synthetic Aperture Radar observation Satellites and AMOS communications satellites, IAI provides top performance with compact and small satellites, offering cost effective solutions for national security and commercial applications.

Missile Defense

Since 1990 IAI has lead the development of Israel's multi-layered missile defense, as the prime contractor for the Arrow 2 and 3 missile defense

Naval Systems

The comprehensive solutions offered by IAI for naval systems range from integrated systems including maritime radars, EO payloads, sensors, command and control for vessels, helicopters and aircraft to security systems, unmanned aircraft and unmanned vessels for coastal and offshore platform security applications. IAI's systems are operating on board hundreds of ships and aircraft serving navies around the world. In addition, combat systems including defensive weapon systems such as the Barak, and offensive weapon systems like the Gabriel missiles, are integrating sensors, missiles and information systems.
