

# Kanfit Ltd.

## Line of Business

Metallic & composite airframe components - detailed primary parts, sub-assemblies and assemblies.

## Established

1986

## Leading Executives

Shai Fine  
General Manager  
& Owner

Moshe Gazit  
Operations Manager

Mark Tolchensky  
Quality Assurance  
Manager

**S**pecializing in the manufacturing, combination and integration of aero-structures from composite and metal products under one roof, Kanfit is a built-to-spec/print aerospace engineering development and production company. We offer A to Z turnkey solution, operating as a one-stop-shop, 0 maintenance subcontractor, to assist our customers to reduce their overhead cost of supply chain management and save resources. Kanfit has unique advanced capabilities in RTM and hybrid aero-structures.

## Quality Assurance

To ensure a high level of quality, Kanfit is AS9100C certified manufacturer, a certified manufacturer of Israel Aircraft Industries, Israel Air Force, Israel Ministry of Defense, Elbit systems, BAE systems, Senior Aerospace (UK), Spirit Aerosystems, and more. Kanfit has Nadcap certifications for Heat treatment and chemical conversion. We also have certifications from Boeing, UTC, and AgustaWestland.

## Products and Services

Kanfit, established in 1986, is producing assembly line kits since 1992, assemblies since 1996, and medium scale assemblies since 1997. Our products are manufactured using various aero-structures manufacturing technologies, focusing on:

- Composite parts and bonded assemblies
- Metallic detailed primary parts & assemblies
- Plastic hot forming and transparencies
- Tooling for production and assembly of metallic and composite parts.

## Main Projects

Our projects include composite and metallic detailed parts and assemblies for: Gulfstream G150 & G280, 7X7, F15, F16, F18, F35, C17, CH47, Eurofighter Typhoon, CSeries, Globals, Challenger, ERJs, UAV's; Heron, Eitan Hermes 450 & 900, RTM chaff and flare magazines, Munition parts, airborne and space antennas, tools, jigs, etc.

Kanfit is based in Migdal-Haemek, Israel.
