

# Metalplast Engineering (MPE)

## Line of Business

Integrated Metal and Plastic Components

## Established

1999

**P**recision from design to assembly - MPE specializes in advanced design, production and assembly of precision plastic and metal integrated parts.

## Complete tailored solutions

MPE provides global clients with a complete quality engineering and manufacturing solution that brings products to life with exceptional quality and expedited time-to-market.

- Innovative Engineering
- Precision Tooling
- Quality Manufacturing
- Advanced Assembly (manual and fully automated)
- Just-in-time (JIT) Delivery
- Flexible Service

## Unique Benefits

Tailored engineering & manufacturing flexibility for optimized end-product performance.

Rapid responsiveness to dynamic customer needs throughout product development and production.

Uncompromised quality with competitive pricing. Accountability - one dedicated service provider managing all sub-contractors from design to mass-production.

## Market Leading Expertise

All of MPE's customers benefits from decades of

engineering, manufacturing and service expertise, combining the most advanced technologies available with highly skilled personnel worldwide.

MPE global customers include leading companies in CleanTech, Aviation, Automotive, Medical, Defense, and Consumer markets.

## Production Sites

**Israel north site** - specializes in manufacturing injection molds and in precise injection-molding for the automotive, medical, electronic and agricultural industries.

**Israel central site** - specializes in manufacturing injection molds and precise injection-molding.

**Poland site** - development and manufacturing of technical plastic components, industrial tools, plastic injection, metal parts, assembly and laser welding facilities.

MPE facilities feature the most advanced manual and automated assembly lines, and the most sophisticated, cutting-edge manufacturing equipment for quality, high-volume production.

## Automotive Customers

### Among our customers:

OEM's - Audi, BMW, Daimler, Seat, VW, Peugeot Tier 1 - Fauricia, Lear Corp., Grammer, Veritas, DANA, Delphi, and many more

## International Standards

MPE production complies with the highest standards of global quality, environmental and safety systems.

## Certification

- ISO 9001 2008
- ISO EN 13485
- TS 16949
- Clean-room production class 100,000
- Production according to GMP

## Software

• CATIA-V4, CATIA-V5 (16,17,18,19) • PROE: 2001i, WF2, WF3 • I-Deas • Solid Works 2007, 2008, 2009, 2009 professional (with Feature Works, Toolbox) • Cimatron • Master CAM Auto CAD • ERP System • EDI system

**MPE - Your ideal choice when precision is as important as innovation.**
