Mrs. Osnat Shira  
Finance Manager

**M**igan Ltd. specializes in manufacturing complete product lines including:

- Quick disconnect couplers for pneumatic, hydraulic, fuel, gases, water and special purposes
- Reusable and rigid hose fittings for low, medium and high pressure
- Air and hand operated pumps
- Valves and connectors for special purposes
- Fuel management systems

## **Company History - Experience & Expertise**

Migan was established in 1953 by the late Moshe Shmoshkovitz and Albert Kimchi. Today the company is managed by Amir Shmoshkovitz who has been with the company for 43 years. With 40 employees the company is located in the heart of the Holon Industrial Zone near Tel Aviv and has facilities for designing, manufacturing and assem-

bling products. Migan's experienced and highly qualified staff pride themselves of the newest methods in metal machining and the latest production innovations.

## **Customers**

Aside from producing standard lines of pneumatic and hydraulic devices for the commercial market, Migan subcontracts for the defense establishment,

Israel Aircraft Industries, oil companies and others.

**Ministry of Defense:** Products according to Migan's designs and sub-contracting military products including fuel system assemblies for heavy vehicles, fire extinguishing products for heavy and light vehicles and general purpose and parts for weapon etc.

**Israel Aircraft Industries:** Aircraft parts.

**Oil Companies:** Standard lines of pumps and pneumatic products, the mechanical parts of fuel management systems that are fully designed by Migan.

## **Exports**

Migan exports about \$1 million annually to the U.S. and Europe. The company's main customer in the U.S. is Parker Hannifin who purchase a complete line of pneumatic safety couplers designed, developed and manufactured by Migan and considered as top-of-the-line in the U.S. These couplers are mainly sold in the U.S. to high-tech users including the aircraft and missiles industries. Products are also sold to Tacom and other U.S. companies. Migan also sells specially designed silicone free couplers and pumps to the car industry in Germany (through an agent).

## **Quality Control**

Since 1996 Migan has been ISO 9001:2000 certified.

## **Production Accuracy**

Production accuracy is to 0.004" and the company's state of the art equipment includes CNC lathes, machining centers and machines for secondary operation. All computerized machines are based on the FANUC computer.

Size of parts from bars are up to 2" and materials used are non-ferrous metals, steel, stainless steel, and special alloys.

## **Capacity**

Capacity of working hours is about 6,500 hours per month in three shifts.

Migan has the ability to increase machining capacity if needed.
