Netafim is the global leader in drip and micro-irrigation solutions for sustainable productivity. With 27 subsidiaries, 16 manufacturing plants, and over 4,000 employees worldwide, Netafim delivers innovative solutions in over 110 countries across the globe. Founded 50 years ago, Netafim pioneered the drip irrigation revolution, creating a paradigm shift in low-flow agricultural irrigation. Netafim is jointly owned by Permira private equity funds, Kibbutz Hatzerim and Kibbutz Magal. In 2013, the company's sales surpassed \$750 million. Netafim is committed to providing comprehensive services and solutions to customers worldwide. By working closely on-site with each customer, the company's professionals carefully

vineyards. Netafim's solution portfolio includes complete drip irrigation systems and computerized monitoring and fertilization control systems.

Project Management, Consulting and Support

Netafim offers comprehensive support solutions – from initial specifications, through detailed design, to system implementation. Systems are designed according to specific local conditions, including crop, soil, climate and water resources. Netafim systems combine economic considerations with ongoing and efficient maintenance and operations, by integrating vast field-proven experience and engineering expertise. The end result is a sus-

examine all relevant factors and grower demands. Netafim offers a complete set of solutions customized to meet the needs of each grower and crop across diverse climates and terrains worldwide.

tainable irrigation solution that leads to the production of more crops with less resources.

Solution Portfolio

Netafim has attained global leadership in providing innovative irrigation solutions and technologies that enhance crop yields, while sustaining the planet's vital resources. Netafim's products provide the foundation for a broad and comprehensive solution offering, enabling cost-effective irrigation of diverse applications such as open-field crops, orchards and

Top Quality is Our Top Priority

At Netafim, commitment to quality is a core value, and the company applies uncompromising standards to every facet of business – from refining development procedures, through conducting exhaustive field tests, to optimizing production techniques. Netafim's products are manufactured according to ISO standards, and its quality assurance system conforms to the stringent requirements of international quality standards.
