CEO

Mr. Niv Shacham
CTO

Niron Systems & Projects is set to meet a vital need in the Defense and Homeland Security markets. Cutting-edge real-time systems and solutions for customers who cannot compromise on quality and performance.

Niron Systems & Projects is a recognized provider of sophisticated technological solutions for Defense and Homeland Security applications. With many years of accumulated experience backing a strong command of the most advanced modern technologies, Niron Systems & Projects specializes in the development and production of

with a customer-oriented approach, enables Niron to offer innovative technological solutions and dedicated systems tailored to meet customer needs and provide for special operational requirements and applications.

The Company Operates in Four Main Product and Service Areas

- Development and production of control systems for self-protection suites including Rockets and Gun Armament System (RGAS) and Chaff and Flare Dispensing System (CAFDS);
- Development and production of mission and communication computers, display units, switching units and hardware solutions for real-time systems;
- Development of software solutions for real-time systems and offline software solutions for virtual environments such as simulators, test benches and data loaders;
- Management and execution of tailor-made turnkey projects.

Customer Support Tailored to Each Specific Project

The specialized know-how and solid project management skills of Niron engineers enables the

company to offer its customers unique services for non-standard technological programs requiring close professional accompaniment. The company is geared to implement on-budget, on-time turnkey projects, in which its experts accompany and support all development, production and integration stages – from system definition, characterization and engineering, procurement, production, installation and integration, through to factory and acceptance tests plus Integrated Logistics Support (ILS) that includes documentation, personnel training, assimilation, and ongoing system support.

Niron Services & Projects customers include the Israeli Ministry of Defense (MOD), Israel Aerospace Industries (IAI), Contract Fabrication & Design (CFD), Israel Military Industries (IMI), Rafael, Elbit, and others. The company is certified to ISO 9001:2008 and ISO 90003:2004.

integrated hardware and software solutions for integration on a variety of manned and unmanned airborne, ground, and surface naval platforms.

Since its inception in the year 2007, the company has been a valued supplier of advanced systems and comprehensive systems engineering services to leading defense and aerospace companies. Using leading-edge technologies the company is able to combine smart modular design, very small mechanical volume and low power consumption, to produce highly integrated systems and offer customers superior solutions, tailored to meet space and power constraints in existing platform upgrade projects, or custom made for new platforms – while keeping budget limits.
