Novamill Mechanical Engineering Inc.

Novamill Mechanical Engineering Inc. is an innovative company that incorporates engineer planning with all aspects of machining as well as activities involving mechanical assembly. We offer advanced, high quality technological solutions that include computerized machining: turning, milling and grinding using all types of materials such as steels, stainless steel, ductile metals, aluminum, plastic and composite materials. This is achieved via highly advanced computerized machining, milling and turning centers in addition to a new and updated computerized planning system operated and supervised by skilled engineering personnel.

In mid 2008 the company moved to its new residence in a modern and air-conditioned building of 2000 SQM in the city of Yavneh (near Tel Aviv).

The Company includes the following departments:

- Model production and prototype department.
- Serial production department.
- Turn-key production in cleanroom environment.
- Gear and Gear Box production department.

All of the functions above are accompanied and supported by a computerized ERP system and a logistical department of purchasing and sub-contractors.

We provide our customers with overall quality and efficient service under one roof.

Types of Equipment in our Factory

- 15 CNC computer processing centers, 1500mm in length combined with fourth and fifth axis.
- 9 CNC lathes with milling ability combined with seven axis and bar feeders.
- Conventional lathes and milling machines with digital reading and control.
- 19 gear production machines made in Switzerland.
- Inspection Room
- 2 computerized XYZ measuring machines.
- Optical measuring machine TESA.
- 4 TRIMOS measuring instruments.
- 2 Computerized COMPERATORS.
- A set of measures and measuring tools calibrated and certified (by the Standards Institution).
- Temperature controlled room.

Quality Assurance

Quality assurance is an internal, independent body that implements quality procedures according to standard requirements.

Supplementary Processes

Thermal treatment, coating, non-destructive tests, welding and other supplementary activities we perform via authorized sub-contractors along with quality reports.

Assembly

Assemblies are carried out in rooms with special environments according to requirements including cleanroom (approximately 150 SQM) at a CLASS 100 cleanliness level.

Novamill Clientele

The leading companies in the semi-conductor field, companies in the digital printing field, medical companies, Israeli Aerospace Industries, and more.

Qualifications

- Quality assurance system is approved by the Standards Institution of Israel ISO 9001.
- Certified supplier of environmental management system ISO 14001.
- Certified supplier of the Israeli Aerospace Industries.

We would be happy to include you in this list of highly esteemed clients. We would also be happy to answer your requests and demands as efficiently as possible. We take pride in the high level of service we provide our customers.

We are at your service to provide you with proposed quotation.
