

# Orbotech Ltd.

Established  
1981

Leading Executive  
Mr. Asher Levy

**O**rbotech is a global innovator of enabling technologies used in the manufacture of the world's most sophisticated consumer and industrial products throughout the electronics, automotive, internet of things and adjacent industries. The company is a leading provider of yield enhancement, production and process innovation solutions for electronics reading, writing and connecting, used by manufacturers of printed circuit boards, flat panel displays, advanced packaging, micro-electro-mechanical systems (MEMS) and other electronic components.

Orbotech's products include automated optical inspection (AOI), automated optical rework (AOR), Direct Imaging (DI), via formation, inkjet, electrical testing and repair and other production and process control systems to digitize electronics manufacturing. Orbotech SPTS Technologies, prod-

recognition solutions used in banks, other financial institutions and healthcare revenue management companies. Orbotech has developed a proprietary technology for use, among other things, in web-based, location-independent data entry for check and forms processing. In addition, Orbotech LT Solar, LLC., (OLTS), Orbotech's joint venture with LT Solar, develops products for the deposition of anti-reflective coating on crystalline silicon photovoltaic wafers for solar energy panels. Of Orbotech's employees, more than one quarter are scientists and engineers, who integrate their multi-disciplinary knowledge, talents and skills to develop and provide sophisticated solutions and technologies designed to meet customers' long-term needs. Orbotech maintains its corporate headquarters, key research and development, engineering and manufacturing facilities in Israel.

Direct Imaging Systems

Deep Reactive Ion Etch Systems

Electrical Testing Systems

Automated Optical Inspection

ucts include etch, PVD, CVD and thermal wafer processing solutions for the MEMS, advanced packaging, LEDs, high speed RF on GaAs, and power management device markets. Through Frontline PCB Solutions, its joint venture with Mentor Graphics Corporation, Orbotech also markets computer-aided manufacturing (CAM) and engineering solutions for PCB production. Virtually every electronic device in the world is produced using Orbotech systems. Through its subsidiary Orbograph Ltd., the company develops and markets character

The company's extensive network of marketing, sales and customer support teams, located in over 40 offices throughout North America, Europe, the Pacific Rim, China and Japan, delivers its knowledge and expertise directly to customers the world over.
