

Ornit Blind Rivets

Line of Business
Manufacturing &
Marketing Blind Rivets

Established
1975

Leading Executive
Hagar Araya
CEO

O rnit Blind Rivets manufactures blind rivets since 1975 and provides fastening solutions for the automotive, constructive and industrial markets. The company's portfolio includes structural rivets, roofing rivets, multi-grip rivets and other fastening solutions made from various alloy combinations of Aluminum, Steel and Stainless Steel.

Market Segments

- **Automotive:** Cars (private Vehicles), Commercial vehicles, Trucks & Trailers, Cable Cars, RVs and Caravans, Trains
- **Industrial:** Military, Construction, Solar, Electronics, Agricultural

Leading Products' Families

- **NEW - Mega Orlock®** - The newest innovation in Ornit's Products Family. The Mega Orlock, a Patent Registered, a Triple locking system that gives the user maximum power, Shear and Tensile strength. The Mega Orlock rivet is being used to secure military applications, automotive heavy duty applications and other large steel constructions.
- **NEW - Mega Bulb** - The structural Mega Bulb rivet has a large blind-side bearing area making it an ideal rivet for use in thin sheet or low strength materials. The Mega Bulb contains a visible mechanical lock to give extra strength to the joint. Can be used in Automotive Plastic Materials, Containers, Commercial Vehicles.
- **Orlock®** - The Orlock is a structural breakstem fastener with great shear and tensile strength. The patented Orlock rivet has a double locking system which ensures the strongest vibration resistant joints whilst the large blind side bearing area spreads the load and prevents creep.
- **Or-Bulb** - The Or-Bulb breakstem fastener is designed with a split tail formation, providing a much larger blind side bearing area against the rear sheet. This also allows for a wide variation

in material thickness. The Or-Bulb blind breakstem fastener is ideal for use with soft, brittle and thin sheet materials.

- **Ornilock and Orbolt** - both are multi-grip structural breakstem fasteners with perfect hole fill to give a fully sealed joint. Have high shear and tensile strength Can be used in high vibration and heavy duty applications.

Quality

One of Ornit most striking advantages is the high standard quality of our Blind Rivets for which they are well known. High standards and top quality products are ensured by quality control tests at all stages of production. The quality perception in the company begins with the senior management and ends with the apprentice, each of whom is personally responsible for the quality of the production and committed to our valued customers.

Research and Development

The R&D department has 40 years in delivering fastening solutions. The team is highly experienced and equipped with the latest technologies to face any fastening challenge. The R&D unique expertise is supporting our customers with Tailor Made products, designing new products and developments upon customer's requirements. The technical team communicates directly with the customers' engineering team to solve any technical issue within short responsive time.

Customers

More than 90% of Ornit's products are exported globally to Europe, North America, Australia, Far East and Latin America. Among our customer you can find leading vehicle manufacturers, Trucks and trailers companies, Private Label companies and other distributing partners.

Ornit Inc.

Is our subsidiary company serves the North American market with a local sales office and provides immediate response to demand. Products are delivered from our stock in Michigan.

International Standards

Ornit manufactures in compliance with IFI 114 and DIN 7337 standards. Ornit's dedication to performance excellence has led us to be awarded with ISO TS16949 and ISO 9001:2008 certifications.
