

# ORT Israel

## Line of Business

Education and Training

## Established

1949

## Leading Executives

Mr. Zvi Peleg  
Director General

Dr. Eli Eisenberg  
SVP, Head of  
Administration for R&D  
and Training

**O**RT Israel was established in 1949 as a Public Benefit Company and it is Israel's Leading Technology & Science Educational Network, with over 500,000 graduates to date.

ORT Israel is the largest education network in Israel, operating over 200 institutions in more than 50 municipalities: comprehensive middle and high schools, industrial vocational schools, education centers and both technology colleges and academic colleges of engineering. 30% of all engineers and technicians in Israel are ORT Israel graduates.

ORT Israel schools curricula include a wide range of innovative subjects, such as: nanotechnology,

mechatronics, aerospace and aviation, electronics, science and engineering, cyber, robotics, biotechnology and many more. ORT Israel is fully compliant with various international curricula requirements and mandatory core subjects. In addition, the Ministry of Education often utilizes ORT Israel experience and knowledge for development of innovative methodologies and advanced curricula for the entire Israeli education system.

## World-Class R&D and Training Center

ORT Israel operates one of the largest Research & Development and Training Centers for Technology & Science education in the world. Having in-house R&D center and a network of schools is the perfect combination that allows theory and

practice to go hand-in-hand. ORT Israel does not only develop advanced educational solutions but it implements them in practice and examines their efficiency and feasibility, creating a continuous circle of improvement and ongoing adaptation.

## International Ventures

Over the years ORT Israel has become a strong and well respected brand in the international arena. With extensive international activities, led by Shalev International Cooperation Department (SICD), ORT Israel has established Israeli export branch of innovative educational solutions and large-scale projects with leading international organizations all over the world, including North America, Russia, Africa, Europe, India and China. With over 60 years of experience, ORT Israel has vast knowledge and experience in dealing with broad spectrum of challenges, such as: improving educational systems, bridging socioeconomic gaps, developing innovative curricula and building the capacity for 21st digital century.

ORT Israel has the capabilities to consult, develop and lead in-depth reforms in educational systems on state level, with emphasis on unique needs of the market, of the industry and specific challenges of the country seeking solutions.
