Innovation, quality, excellent service and experience-based expertise: That's what you can expect from OSG. Whatever it is - if it's glass, we can do it. From automotive and architectural glass systems to glass for rail, heavy engineering machinery and transparent armor for the defense and security, military and civilian sectors, OSG is a leading expert in these fields.

ON THE MOVE: GLASS SOLUTIONS FOR THE TRANSPORTATION INDUSTRY

Chances are you've seen our handiwork going down the street in the form of a bus, car, train or tram windshield or window. We handle transportation glass process from beginning to end, and currently our glass products are available in more than 50 countries around the world. We focus on remaining at the forefront of technology, bringing new developments, compositions and technologies for all transportation vehicles: ground, naval and airplanes.

Rail: From A to Z with system solutions

OSG provides complete solutions for all types of trains and trams, from glass to frames and supporting systems, researched and developed to the customer's request.

All our products comply with the latest industry standards including: R43, ANZI Z26.1, BSI, BN 918511, UIC, DB, EN 15152, BS, FRA type I and FRA type II, NF F, ISI and the USA TIER 2 for windshields.

Cars, Trucks, Buses & Coaches

We make a great variety of windshields and side-lights for most types and models of vehicles.

What's more, we proudly serve several leading glass manufactures and OEM companies around the world. Options are unlimited and include laminated, tempered or IGU, curved or flat glass with or without silk print and other applications. All our products are tested in-house and meet the ECE, R43 and other major standards.

OSG's latest developments for the transportation market include:

- light-weight compositions, with total glazing weight up to 40% lighter
- high impact solutions
- anti-reflective glasses
- IR-protective technology
- anti-vandalism glass against various threats
- Windshields for high-speed locomotives

Construction & Agriculture

OSG has an impressive track record in working with major OEM manufacturers in the field. We have de-

veloped special solutions for heavy duty and agriculture machinery that meet all the sector's needs.

PROVEN TRACK RECORD IN TRANSPORTATION INDUSTRY

We have worked with manufacturers such as Siemens, Bombardier, Alstom, Talgo and CAF in numerous projects including AMTRACK new generation of high-speed locomotives, Houston and Portland LRV and Illinois high-speed train. We are also involved in the design and manufacture of a new BRT platform in Israel as well as numerous OEM bus platforms world-wide.
