Paltechnica is the Israeli market leader in developing, designing and manufacturing of ready-made and made-to-order seating solutions for the domestic and international markets. Founded in 1943, the company expanded its product offerings from office to transportation and defense seating solutions.

Paltechnica, located in Kibutz Nitzanim, covers most of its products' value-chain: R&D, PU Injection, Metal Works, Upholstery, Assembly, Marketing, After-Sales Services.

Public Transportation Seating Division

Since 95's, this division specializes in developing and manufacturing of seating solutions for public-transportation such commercial vehicles, buses and trains, featuring uncompromising transport safety standards that ensure high quality and durability. Paltechnica adapts its seating solutions to meet specific customer needs. Paltechnica is the

made innovative, proprietary EA crashworthy seats for all types of applications in armored vehicles. The products are specially designed to assure survivability of the crew, in occurrence of mine blasting & IEDs.

PU Division

With its advanced Polyurethane (PU) Injection line, Paltechnica has expanded its portfolio to a verity of products. This division, its technology and mainly, its significant Know-How, has brought Paltechnica the capabilities to develop wide-range of applications to which the PU properties (i.e. Energy Absorption) are beneficial.

Certifications

Paltechnica sees Safety and Quality as two of its core values. Therefor, the company has invested in related standards:
