

# Plasan

**Line of Business**  
Survivability and  
Armor Solutions

**Established**  
1985

**P**lasan is an international company engaged in the design, development, and manufacture of state-of-the-art, lightweight, ballistic armor protection products and integrated survivability systems.

Plasan provides customized survivability solutions for tactical wheeled vehicles, aircraft, naval platforms, civilian armored vehicles and personal protection for military, police and law enforcement applications.

combines computer-generated analysis and simulations with real-time calibration and ballistic test data. The effective combination of test and simulation data enables improved simulation accuracy and performance, resulting in the optimal survivability solution.

Plasan is primarily known for armored protection, but has since widened its range of products and solutions into other parts of the military, security and the commercial sector.

Plasan combined innovative survivability engineering and design with advanced armor materials' development. Plasan's unique development process is based on continuous dialogue between the ballistic R&D and the Design & Prototype departments. This integration between the different disciplines enables us to give the defense forces the optimized survivability system for a range of military and law enforcement purposes. Plasan

With the establishment of its two new divisions, "Plasan Security Solutions" whose mission is to focus in providing multi-tasking tactical vehicle solutions for border patrol and critical infrastructures and "Plasan Commercial Composite" division whose mission is to provide advanced material solutions for the commercial sector, Plasan range of offerings goes far beyond its armored protection solutions.
