

Polycart Technologies Ltd.

Line of Products

Large and complex parts with special surface designs

Established

1977

Leading Executives

Mr. Menachem Grinshpan
General Manager

Mr. David Deshe
International Marketing

Polycart Technologies LTD. is a privately owned company since 1977 and specializes in thermo forming manufacturing. The company is located at Northern Israel's Western Galilee area occupying more than 4,000 sq./mr. plant.

Our various capabilities include manufacturing of parts sized up to 4,200 mm x 2,200 mm x 40 mm. In addition, finishing capabilities include milling ranged at 3,000 mm x 1,500 mm x 600 mm with 5 Axis CNC router machine and tools switching.

Interior Parts

Amongst our various finishing capabilities are aluminum and PE welding, assembly and cutting and perforation presses.

Our engineering department teams with our customers helping them during the development process to cater the design suitable for thermoforming technology. Our advanced CAD CAM systems enable accuracy and smooth cooperation with our clients.

Polycart manufactures our own ABS sheet at in-house extrusion site providing our production line timely supply of quality material enabling greater

level of price competition. Additional raw materials in use are: PC, HMWPE and HMWPE.

Our experience and expertise advanced our performance enabling to meet special surface finishing such as acrylic coating and "woodlook".

Polycart engaged into the automotive industry more than 10 years ago supplying after-market parts for larger vehicles such as vans, minibuses and buses. Our major strengths within the automotive in-

Pipes for ventilation systems including welding process

Inserts installation

Parts meeting various surface textures

dustry are, manufacturing of large and complex parts and weight reduction process.

Our customers list, include manufacturers like Plasan, Paltechnica, TMN, Auto Cool and Automotive Industries.

Our range of parts consists of parts for ventilation and A/C systems, interior parts, parts for seats and others, most which, comply with large and complex part criteria.

Polycart Technologies is ISO 9001-2008 Certified.
