Polymer Gvulot deals, as a formulator, with three main materials families: Epoxy, polyurethane, and RTV silicone. Polymer produces a wide range of materials for many applications. The company's range includes one component adhesives and two components potting compounds, encapsulating materials, sealants, a wide range of adhesives, mold making materials, casting etc."

Type of Business

Automotive Equipment and Systems; Defense Equipment and Systems; Electrical and Electro-Mechanical Products; Electro-Optics; Electronics; Machinery and Electronics; and Plastics, Rubber, Packaging and DIY, Mold-Making RTV Silicone and DIY Adhesives.

Highest Standards

Polymer's compounds meet the highest demands of the electronic and high-tech industries and serve these industries as well as other sectors such as building, mold and duplicate industries, casting and even art. Special attention has been given to adhesives, which have been approved by end-users in the electronics and high-tech industries. Polymer's team works together with customers to find the best possible solutions for all problems.

Main Products and Services

Polymer's main products include over 300 different compounds based on epoxy, polyurethane and RTV silicone. Each of these compounds has its own properties and was designed to meet market needs including one and two components performed as potting, encapsulating materials, casting, sealants, mold making materials and above and beyond this - adhesives based mainly on epoxy and polyurethane.

Tailor Made Solutions

In addition to providing these products, Polymer's team specialized in matching "tailor-made" solutions for the end-user in order to meet specific demands. Lists and specifications can be found on the company's website: www.polymer-g.com
