Specialty films include heavy-duty display film for furniture and DIY products, hermetically sealing antifog film for poultry, meat, and fish, and a film designed to wrap and protect freshly harvested vegetables. We also offer oxo-biodegradable shrink films.

Our shrink films are manufactured in thicknesses from 9 to 50 microns, with excellent clarity and gloss, superior shrinkage properties, and strong seals. Syfan shrink films are made exclusively of non-toxic and environmentally friendly materials, and are fully recyclable.

Marketing

Syfan shrink films are sold through our marketing

Europe and Canada that approve packaging materials for food contact applications.

Team

Syfan's staff includes 200 employees at two locations. Our dedicated teams cover the responsibilities of management, R & D, quality assurance and control, ERP, all phases of production, logistics, marketing, and customer service.

Syfan employees at all levels consider themselves an integral part of the company and are extremely loyal. The company has been granted the "Beautiful Industry in Israel" award for the past 20 years.
