

# Tambour Group

## Type of Business

Paints & Coatings, Gypsum Boards & Blocks, Insulation Products, Acoustic Ceilings, and Construction Finishing Materials.

## Established

1936

## Leading Executive

Mr. Michael Dayan  
CEO

**T**ambour has been leading the Israeli paint and construction materials market since 1936. From its early days up until today, it focuses on top quality materials in any category, dedicated to professional consultancy and service, and aims to professionalize in every aspect of construction area. Nowadays Tambour is a private company controlled by Kusto Roofing PTE, an international corporation with holdings in construction, infrastructure and energy worldwide.

## Tambour Group produces – A Wide Variety of Products

**Decorative Paints** – Tambour has a wide range of paints and coatings for interior and exterior walls, wood, metal and decorative effects. In an effort to provide its customers professional and accessible service, Tambour has placed more than 750 in-shop computerized tinting systems throughout the country.

**Industrial Paints & Coatings** - Tambour develops paints & coatings for protecting metal and concrete structures in marine, urban and heavy industry environments.

**Automotive Paints** – Tambour's fully owned subsidiary manufactures automobile paint for automobile repair shops, and has exclusivity on Glazurit and Salkomix products from BASF Corporation.

**Printing Inks** – Tambour's advanced printing ink plant specializes in water-based inks, UV inks, offset inks, and more.

**Advanced Construction Materials** – Tambour's Ashkelon plant manufactures emulsions and adhesives for construction and wood, construction additives, and sealing materials, holding marketing franchises for Henkel construction products and BASF Construction Chemicals infrastructure products.

**Gypsum Products and Dry Building** – In early

2006 Tambour acquired 51% of Gesher Gypsum, which specializes in gypsum products, including gypsum coating, and other gypsum products for construction and industry. In 2010 Tambour built a plant for the production and marketing of gypsum boards and gypsum blocks, offering a wide range of products to the professional and DIY consumers. In 2012 Tambour built a plant of studs and tracks accessories for gypsum boards.

## Environmental Activities

Most of Tambour's products carry the "Green Standard" "Diamond Standard" and ISO 14001 and are compatible with the stringent environmental standards in Europe. Tambour offers a wide range of water-based products for a variety of decorative uses.

## Research and Development

Tambour has advanced R&D labs, and is constantly investing in research and product development. Tambour is also a member of two international groups that host the paint industries: NOVA - an international organization of paint manufacturers, and CRGI - an international research group.

## Operations

Tambour operates a number of production sites, including three paint production sites, a construction powder site, a site for the manufacture of emulsions, a site for advanced building materials and printing inks, and two production sites for gypsum products. A computerized operating warehouse allows for the efficient delivery of Tambour products to approximately 1,500 customers, paint stores, as well as to other points of sale throughout Israel as well as worldwide.

## Service and Marketing

Technical consultants provide ongoing support to architects, contractors, retailers and homeowners. The "Telezeva" call center provides telephone consultation to all. "Tambour House" concept store and design center provides consulting services to individuals and professionals on colors, textures, effects, and complementary products. "Tambour at Home" is a color consultancy services that arrives to your house. "Tambour Studio" has 30 POS in partnership with leading retailers. These mini concept stores feature the same services as Tambour House, throughout Israel.
