CEO

Ofer Avidan
CEO WFI Group

Triple-T is an engineering company specializing in the design, construction and operation of wastewater treatment plants, with an emphasis on innovative technology. With over 25 years of experience, we leverage our knowledge across available technologies to deliver the most efficient, cost-saving solution for our clients. Our patented TAYA technology exemplifies this mission statement by achieving high performance wastewater treatment at the **lowest operating cost of any technology on the market.**

What is TAYA?

TAYA is a unique wastewater treatment solution that combines the simplicity and operational benefit of extensive systems, with the intensive treatment capability of electro-mechanical systems. TAYA is a biological treatment process,

TAYA is a proven technology operating in Israel for over 6 years, delivering high quality results at the lowest operational costs available.

based on the filling and draining of subsurface flow basins to achieve total atmospheric aeration. This process is enhanced by Triple-T's proprietary pumping arrangement, engineered for maximum efficiency in operation.

Advantages of TAYA

- High treatment; 90% reduction of BOD, COD, Total-N, etc
- Low energy requirement; 10-20% of activated sludge
- Low labor & maintenance requirement
- Minimum secondary sludge production
