

YOUR COUNTRY. YOUR CITY. YOUR PEOPLE. SAFE & SECURE

The NICE security offering empowers organizations to capture, correlate and analyze “big data” generated by multiple sensors and channels, which helps governments and enterprises anticipate, manage and mitigate security, safety, and operational risks, and make the world a safer place.

NICE Security solutions are used by thousands of customers worldwide, including government agencies, transportation systems, critical infrastructure, city centers, banks and enterprises, to secure people and leverage their most important business assets.

NICE Security Solutions:

- Situation Management
- IP Video Surveillance
- Incident debriefing and investigation
- Communications interception and analysis
- 3D Mobile Location Tracking
- Web Intelligence
- Social Network Analysis
- Anti-Money Laundering

Join the world’s largest countries, cities and agencies that keep their public safe with NICE.
