

# A Distinctive Way of Seeing

After years of providing survivability solutions to armed forces around the world, Plasan is now expanding its resources and capabilities to the challenges of Homeland security.

## Plasan Security Solutions

Plasan mobile Security Division provides customized solutions for national infrastructure protection, specializing in covering vast regions of varying dimensions such as borders, long gas pipes, oil & electricity infrastructure in a unique approach.

We tackle the challenge in the same approach we have practiced for years – innovative approach, thinking as users, seeing things in a distinctive way. Plasan, examining the challenge through the eyes of the customer, is positioned to provide optimal solutions to the needs. We offer comprehensive and modular solutions that allow

interfacing to existing systems and infrastructure.

## Our capabilities include:

- Advanced sensing elements - emphasise on mobile surveillance capabilities.
- Virtual fence - cost effective & low power consumption.
- Command and control elements to create a common language between the different forces (mobile and stationary) enabling quick and efficient decision making.
- Data management capabilities and Data fusion to produce meaningful information for planning and real-time response.

Plasan is capable of delivering a comprehensive solution or complementary subsystems to the end user, as well as supplying subsystems and products to major prime suppliers (OEMs). Plasan has proven for the last three decades that it is capable of responding quickly of delivering on time the best solutions in an innovative and unique approach and we shall continue in the same vein in the future as well.
