

# Advanced, custom-designed tactical textile products and solutions

**T9 Design Ltd. specializes in characterization, design, development and production of quality textile products for military, security and civilian applications, including:**

- **Combat vests and military accessories**—for routine security activities, low-intensity warfare and long-term military operations.
- **Tactical Carriers, heavy-duty bags and accessories** for special military equipment such as: Missiles, Tactical ladders, UAVs and more.
- **Tactical Vests, gun holsters and accessories** for homeland security and search and rescue units and personnel.
- **Bulletproof protective vests.**

Among our clients are various **units within the Israeli military forces, Israeli Police units, search and rescue units, national and municipal security units**, as well as civilian clients from a variety of fields.

## **Decades of operational experience—at your command!**

T9 Design's team of experts provides you with vast knowledge and years of experience in designing and manufacturing operational gear. As a registered licensed supplier of the Israeli Ministry of Defense, T9 Design's battle-proven products are manufactured according to ISO requirements and meet the strictest MIL-STD standards.

## **Custom-tailored solutions for every client—big or small**

T9 Design's uniqueness lies in its ability to customize perfect solutions tailored according to our clients' specific needs—starting with an individual soldier or security officer who needs a one-of-a-type product, through military and security units with dozens of members, to integrators and large organizations interested in benefitting from T9 Design's ability to mass produce products with the highest level of sewing quality available.

## **Custom-Made or Off-the-shelf. The choice is yours**

T9 Design provides both off-the-shelf products and all-inclusive solutions, manufactured precisely according to the client's needs. The entire production process is done in Israel by a staff which specializes in production of security products.
