

INTEGRATING PEOPLE, PROCEDURES & TECHNOLOGY

The Sdema Group is a homeland security solutions partnership specializing in security concept design, planning and project management for governments and enterprises worldwide. At Sdema, we believe that the only way to confront the ever shifting threats challenging communities, businesses and governments is by providing solutions that integrate the three pillars of homeland security—people, procedures and technology.

Our team of industry leaders acts as holistic “Security Architects” delivering threat assessments & risk analyses; operational master planning; management of installation and integration of technological systems; audit & control; emergency preparedness; contingency planning; and advanced training.
