AFIK is an intelligence security consulting firm which was established out of a vision and concern for the security of the global business community in this time of heightened attention to the impact of threats on everyday activities.

AFIK is a Hebrew word meaning "route." Thus, AFIK represents a way, a new way if you will, of intelligence planning for your protection.

CEO and founder of AFIK held the rank of Lieutenant Colonel in I.S.A. (Israel Security Agency "Shabak"), the Israeli government counter-intelligence and internal security service. He has more than 20 years' experience in the management of many operational defence and attack mechanisms, including the establishment and management of training systems still in use by I.S.A.

Main Products Offer Operational Activities

- **Management and operate business intelligence operations**
 Target market: Large companies and corporations, banks, authority's financial enforcement, business people, victims of hostile fraud.
