Challenges, together with its affiliate security experts and technology providers, offer unique approaches to the growing needs of protection against crime and terrorist attacks in three major areas of HLS:

- Transportation Security – Airport / Aviation, Seaport, Train and bus terminals and truck cargo.
- First Response – Emergency Mobile Medical Hospitals and its complete training of staff, C3 for First responders, High Rise Building Rescue system, MCI mobile response system.
- Safe City – Safe Communities and cities with full support of various equipment and advanced C3 applications.

TBS – Trust based Security

A unique advanced complete Airport / Aviation Security system installed operated and maintained

utilizing current security tax funds with NO COST to the country and using local manufacturing and private security companies.

Emergency Response Systems

Advanced method of placing a complete 300 bed mobile hospital at Teaching hospitals with a complete E-Learning and training scheme for the medical staff. The system can be deployed in less than 6 hours to any part of the world.

Safe Community

A unique automatic access control to gated communities with a 3 year contract that cuts 40%-50% of the current community expense. Provide home security as part of the system that can be expanded to complete community security system. Unique real time link to police and first responders.
