Ashdod Port, the economic gateway to the State of Israel, is strategically located only 40 km from Tel Aviv, close to the country's major commercial centers and highways.

Comprehensive Services

Ashdod Port provides customers with a comprehensive array of services including logistic services such as:

- Bringing ships into port and anchorage.
- Comprehensive shipping services.
- Unloading, storage and loading of cargoes.
- Emptying and storage of freight containers.
- Infrastructure for passenger liner anchorage, providing top-quality service and handling for passengers and their luggage.
- Port's vicinity has bonded warehouses, citrus fruit and agricultural produce warehouses, cold storage, grain silo, freight container repair and cleaning services.
- Office complex at the Port's inland terminal used by customers, suppliers and various institutions.

Advantages of Ashdod Port

- Adjacent to the center and south of the country, easy access to traffic routes
- Adjacent to the Suez Canal
- Broad and advanced infrastructure including a computerized freight port managed by means of a TOS system

- Growth potential for storage and operational space
- Adjacent to railway tracks
- A future innovative computerized entry and exit gate for trucks
- Dock depth of 15.5 meters.

Improving Customer Service

The Ashdod Port has set itself a target of implementing a customer service strategy, which places customer's needs at the forefront of the Port's activities. In recent years the company has invested substantial funds for purchasing equipment and infrastructure and is set to invest additional sums within the next few years. The introduction of new, sophisticated technological equipment, expansion of the work force, development of the new docks and other customer service initiatives, are expected to reduce waiting times for ships.

Business Services and Customer Databank

Ashdod Port is managing and developing a databank to manage customer relations and the receipt and distribution of information between the Port and its customers. The ports Unit for Marketing & Sales consolidates, manages and strengthens the connection between Ashdod Port Co. and its customers in Israel and abroad in the logistics and shipping sector. The Unit stresses customer service and provides direct and swift responses to needs and requests addressed to company headquarters, while adhering to an outstanding approach in service and a commitment to providing efficient and quality service.

Ashdod port is a significant link in the supply chain and handles the removal of obstacles that are not under its direct responsibility for the benefit of its customers who are its partners.

Ashdod Port acts to create a synergy including transport procedures, while understanding that this is one integrated logistic system.
