Athena is a security and intelligence solutions provider delivering various services and products. The company was established by Israeli security veterans, headed by Mr. Shabtai Shavit, former Director of the Israeli Mossad. Athena provides a wide range of capabilities including turn-key project execution, services and advanced proprietary software-based solutions to the intelligence community and security forces worldwide.

Services

Athena's versatile services are tailored for the unique needs of each organization. Our customers include Governments, Presidential and National Guards, Intelligence organizations, Special Forces units and other security and counter-terrorism organizations. Athena's professional services are based on demonstrated domain expertise and an insight into customers' challenges and opportunities. Among our services are Strategic Consulting, Disaster preparedness, management and recovery,

Intelligence and Law Enforcement tailor-made training courses, Dignitary & Presidential Close Protection, vetting of security personnel, and more.

State-of-the-Art Products

CK2I

CK2I supports the entire Intelligence Cycle: a unified, comprehensive information exploitation platform for managing the intelligence production workflow, based on powerful data mining, analysis capabilities and Athena's best of breed intelligence experts knowledge. CK2I provides the right information to the right person at the right time.

CY-HUMINT

CY-HUMINT is designed to provide OSINT analysts with the capability to identify threats before they materialize. With CY-HUMINT, the Intelligence organization can operate in the "Deep Web" world of social networks, forums, blogs, and micro-blogs securely and effectively.
