**E**stablished in 1983, Bental Industries Ltd. has been well known for the design and manufacture of reliable, high performance, high precision, high power yet low weight motion systems and subsystems that operate in the most challenging of industrial and combat environments. Bental's products are integrated into a wide variety of platforms and applications including turret and gun control systems for AFVs, UAVs, missiles, jet engines, cryogenic coolers for thermal imaging systems, optical systems, and rotational drives for large antenna pedestals.

A leading supplier of specialized motion systems and electro-mechanical solutions for a wide range aerospace, defense, and industrial applications.

**Bental offers:**

- Complete Electro-Mechanical Stabilized Systems

- Starter Alternators and GCUs (Generator Control Unit) for aerospace and ground applications
- Servo Actuators
- High Speed Alternators for Jet Engines and other applications
- High Performance High Torque, Brush/Brushless Electric Motors
- Brush/Brushless Servo Motors
- Electronic Drivers & Controllers
- Limited Angle Torque Motors

The company employs 120 highly skilled professionals and is owned by TAT and Kibbutz Merom Golan.

Bental is a certified supplier to the IMoD, IAI, Rafael, Raytheon, Elbit, Insitu / Boeing, Thales, AAI, Galileo Avionica, Schiebel, Oto Melara, EMT and others.

**WHEN EVERY OUNCE COUNTS**

- Propulsion Motors
- Alternators & Starters
- Micro EO Stabilized Systems
- Servo Actuators

**High Power - Low Weight**

**SMART & SIMPLE SMALL & STRONG**

**High Power - Low Voltage**

- Brushless Motors
- Blowers & Dust Scavengers
- High Power Actuators
- Limited Angle Torque Motors

**The One-Stop-Shop for Innovative Motion Technologies**
