Check Point Software Technologies Ltd. (www.checkpoint.com), the worldwide leader in securing the Internet, provides customers with uncompromised protection against all types of threats, reduces security complexity and lowers total cost of ownership. Check Point first pioneered the industry with FireWall-1 and its patented stateful inspection technology. Today, Check Point continues to develop new innovations based on the Software Blade Architecture, providing customers with flexible and simple solutions that can be fully customized to meet the exact security needs of any organization. Check Point 3D Security uniquely combines policy, people and enforcement for greater protection of information assets and helps organizations implement a blueprint for security that aligns with business needs.

OUR PRODUCTS

Check Point's solutions include an extensive portfolio of innovative and market leading security products, ranging from network and gateway security solutions, to data, endpoint, management and virtualized security solutions. Check Point security appliances deliver powerful turnkey systems for deploying and managing Check Point's award winning Software Blades to address virtually any security need for businesses of all sizes. Strong and proven, the Check Point security appliances provide reliable services for thousands

of businesses worldwide.

Check Point's Software Blade architecture enables organizations of any size to efficiently tailor targeted managed solutions that meet targeted business security needs. All solutions are centrally managed through a single console that reduces complexity and operational overhead.
