Checkmarx EMEA
Azrieli Towers
Round Tower - Level 22
132 Menahem Begin St.
Tel-Aviv, Israel
Tel: 972-3-7581800

Checkmarx Ltd. (www.checkmarx.com) is a global application security leader which uses its next generation Static Code Analysis (SCA) solutions to identify security vulnerabilities within applications. Checkmarx technology provides its customers with unparalleled protection against all types of security threats while optimizing the security auditing process and minimizing the total cost of ownership.

Checkmarx provides the best way for organizations to introduce security into their Software Development Lifecycle (SDLC) which systematically eliminates software risk.

The Static Application Security Testing (SAST) solutions streamline the workflow of key stakeholders in the software development process, increasing their effectiveness in finding problems and reducing the need for costly professional services.

The product enables developers and auditors to easily scan uncompiled / unbuilt code in all major coding languages anywhere, anytime. For CISOs, it means that securing applications in the enterprise is finally practical and achievable.

Checkmarx's application security testing solutions are available in both "On Premise" and "On Demand" (SaaS) configurations. The security testing scans for the most prevalent security vulnerabilities as determined by OWASP Top 10, SANS 25 and other major standards.

Checkmarx was recognized by Gartner as sole visionary in their latest SAST magic quadrant and as a Cool vendor in application security.

Our Products

Checkmarx's CxSuite is the most powerful Source Code Analysis solution designed for identifying, tracking and fixing security flaws from the root: the source code. CxSuite provides a high degree of flexibility and configurability by supporting a wide range of vulnerability categories, operating systems (OS), platforms, programming languages and frameworks.

The patented virtual compiler employed by the CxSuite enables the unique capability of scanning uncompiled / unbuilt code, which guarantees highly accurate results with virtually zero false-positives.

The advanced visualization of vulnerabilities is the key to quick remediation of the identified vulnerabilities, by presenting the full attack path and graphically displaying the optimal location in the code where the problem should be mitigated.

Checkmarx's supports virtually any project size and scans over. 1,000 vulnerabilities out of the box including: SQL Injection, Cross-Site Scripting (XSS), Code Injection, Buffer Overflow, Parameter Tampering, etc.

Our Customers

Checkmarx's products are sold to Fortune 500 enterprises, government agencies, service providers, small and medium sized businesses and single developers in over 30 countries.

A select few of our customers include: US Army, salesforce.com, LivePerson, Atlassian.

Line of business: Application Security Solutions
Established: 2006
