**C**ONTROP Precision Technologies Ltd. specializes in the development and production of Electro-Optical and Precision Motion Control Systems. CONTROP's operations are characterized by Quality, Innovation, Cost Effectiveness, Reliability and Full Product Support to the Customer.

CONTROP provides some of the most innovative solutions for Surveillance, Reconnaissance, Defence and Homeland Security activities used in the world today. CONTROP's products are in daily operational worldwide, providing unmatched results for security and protection.

### CONTROP's specialization includes:

- High performance Stabilized Observation Payloads used for day and night surveillance on board: UAVs, Small UAVs, Helicopters, Light Aircraft, Aerostats, Maritime Boats and Ground Vehicles.
- High performance wide-area coverage (real time) EO stabilized payloads for day and night reconnaissance on board UAVs and Light Aircraft.
- Automatic passive long range Intruder Detection Systems for Homeland Security including perimeter security, border security, coastal and port protection, airport protection, ground troops security and more.

- Thermal Imaging Cameras with high performance continuous zoom lens.
- Directional Antenna Pedestals for UAV and ground applications.
- Stabilized Antenna Pedestals installed on aerial vehicles for satellite communication relay applications.

### Main products

CONTROP's main products include a wide variety of products for various applications including:

- Day/Night Observation and Surveillance
- Homeland Security
- Search and Rescue (SAR)
- Law Enforcement / Police Applications
- Coastal and Border Patrol
- Anti-terrorist Surveillance
- Anti-smuggling Surveillance
- Oil Spill Detection
- and more

First-hand experience in the "war against terrorism" brings the focus to CONTROP as a world leader in security and defense, due to the company's innovative solutions for airborne, maritime and ground surveillance applications.

**Line of Business:** Electro Optics  
**Established:** 1988
