El-far Electronics Systems 2000 Ltd develops and produces advanced perimeter security technologies and applies integrated solutions incorporating intruder detection, recognition and protection at a wide variety of military, critical assets and civilian facilities in Israel and around the world.

El-far technologies provide its customers with comprehensive perimeter security solutions that meet the highest standards and requirements of top secret sites and critical assets installations around the world.

El-Far security systems have been tested and approved both by the IDF (Israel Defense Forces) and security organizations in many countries.

Key Features

El-far's systems are operated worldwide under extreme environmental conditions. Being low voltage system and safe for use in an explosive environment, the systems are operated in sensitive

locations of gas and oil and can be powered by solar energy.

Areas of Activity

Among others, El-far solutions are deployed at international borders, international airports, sea ports, nuclear power stations, train stations, critical assets, prisons and more.

Other Important Information

El-Far's R&D team is constantly developing new cutting edge technologies and sensors to meet emerging threats in the field of detection and perimeter protection.

Founded in 2000 and privately owned, El-Far is headquartered in Israel.

El-Far was chosen as number 9 at the 2008 Deloitte Technology fast 50 Israel.

Seeking

- Integrators for homeland security projects.
