**G**AMA Operations is an international company based in Israel, which since 1995 has specialized in advanced telecommunications systems. The company's systems have been developed in-house by a highly skilled team drawn from the cream of Israel's technological talent that have proven their market success. Over 15,000 offices, businesses and organizations in Israel and abroad have purchased a wide range of GAMA's VOIP protection, voicemail and IVR systems.

GAMA Operations has gained a major reputation for the telecommunications systems designed for emergency services - where the test is the ability to handle huge workloads within highly pressured time periods. Since 2000, the company has supplied the Israel Defense Forces with the main call-up system used for emergencies and military training. In addition, the company has developed new promising solutions to secure and Encrypt IP Pbx's. The company is highly flexible in adapting to clients' requirements and uses its expert skills to respond rapidly and reliably to calls from anywhere around the world. GAMA Operations will

build a complete turnkey solution or contribute expertise at any specific stage – all with the goal of significantly improving the client's operational performance.

The company's main advantages against its giant rivals are:

- The ability to provide tailor made solutions.
- Pricing – the company can handle small and medium projects.
- Our products are very flexible and upgradable.
- Excellent ROI for medium large scale projects.
- Integration with many kinds of Pbx's.

The company can provide solutions and applications like:

- Speech recognition, hotel voice mail, WTR-reporting work hours, Gate Access, turnkey IVR SOLUTIONS and more.
- High grade Operational experience – the Israeli army call up system.
- Protection and encryption systems to IP Pbx's.
- Cloud VOIP platform for call / video / sms.
- Encrypted conference call systems.
